EC Lines

Football full field marking directions step by step. No measuring required! Please read directions and look at diagrams before marking football field.

Step #1 Find the corner of the field. Each Eazy Crease field line holder **(Pic 1)** has a number attached to each line holders 1, 2, 3, and 4. Start with end loops on line 1 and end loop on line 2, loop has **#** and **Start tag**. Stake each end loop together using the spikes on the corner of the field **(Pic 2).** Roll out line 1 wire down the sideline, and line 2 cross the end line. Now attach line 3 end loop to line 2 end loop by placing a spike in the loops, roll out line 3 down the other sideline of the field. Now attach line 3 end loop to line 4 end loop placing spike in the loops together and roll out line 4 at the opposite end of the field. Attach line 4 end loop to line 1 end loop by placing the spike in loops 1 and 4 together. Now you should have a full field boundaries **(Pic 3).** Make sure lines are straight and tight. Check the corners to insure they are at a 90 degree angle by placing the line holder outside edges to the outside edges of the corner clips. These clips are located near the beginning and end of the line loops of the lines **(Pic 4).** Now start painting the field by placing your striping machine wheels on the right edge of the line, this keep paint from getting on the lines and the # tags **(Pic 5).**

Step #2 Now that you have painted the boundaries of the field, move End line 2 or line 4 to clips **G** on sideline 1 and 3 **(Pic 6).** Place spike next to clip marked **G (Pic 7)**. This will allow you to mark Goal line from side to side. Make sure lines are straight and tight. Now start painting the line by placing your striping machine wheels on the edge of the line, this keeps paint from getting on the lines **(Pic 8).**

Step #4 Repeat step #3 for clips 10, 15, 20, 25, 30, 35, 40, 45, and 50. Repeat for other half of field. Make sure lines are straight and tight. Now start painting lines by placing your striping machine wheels on the edge of the line, this keeps paint from getting on the lines. Clip mark **H** on each side of line 2 and line 4 is to aid if you want to add hash mark **(Pic 14).**
